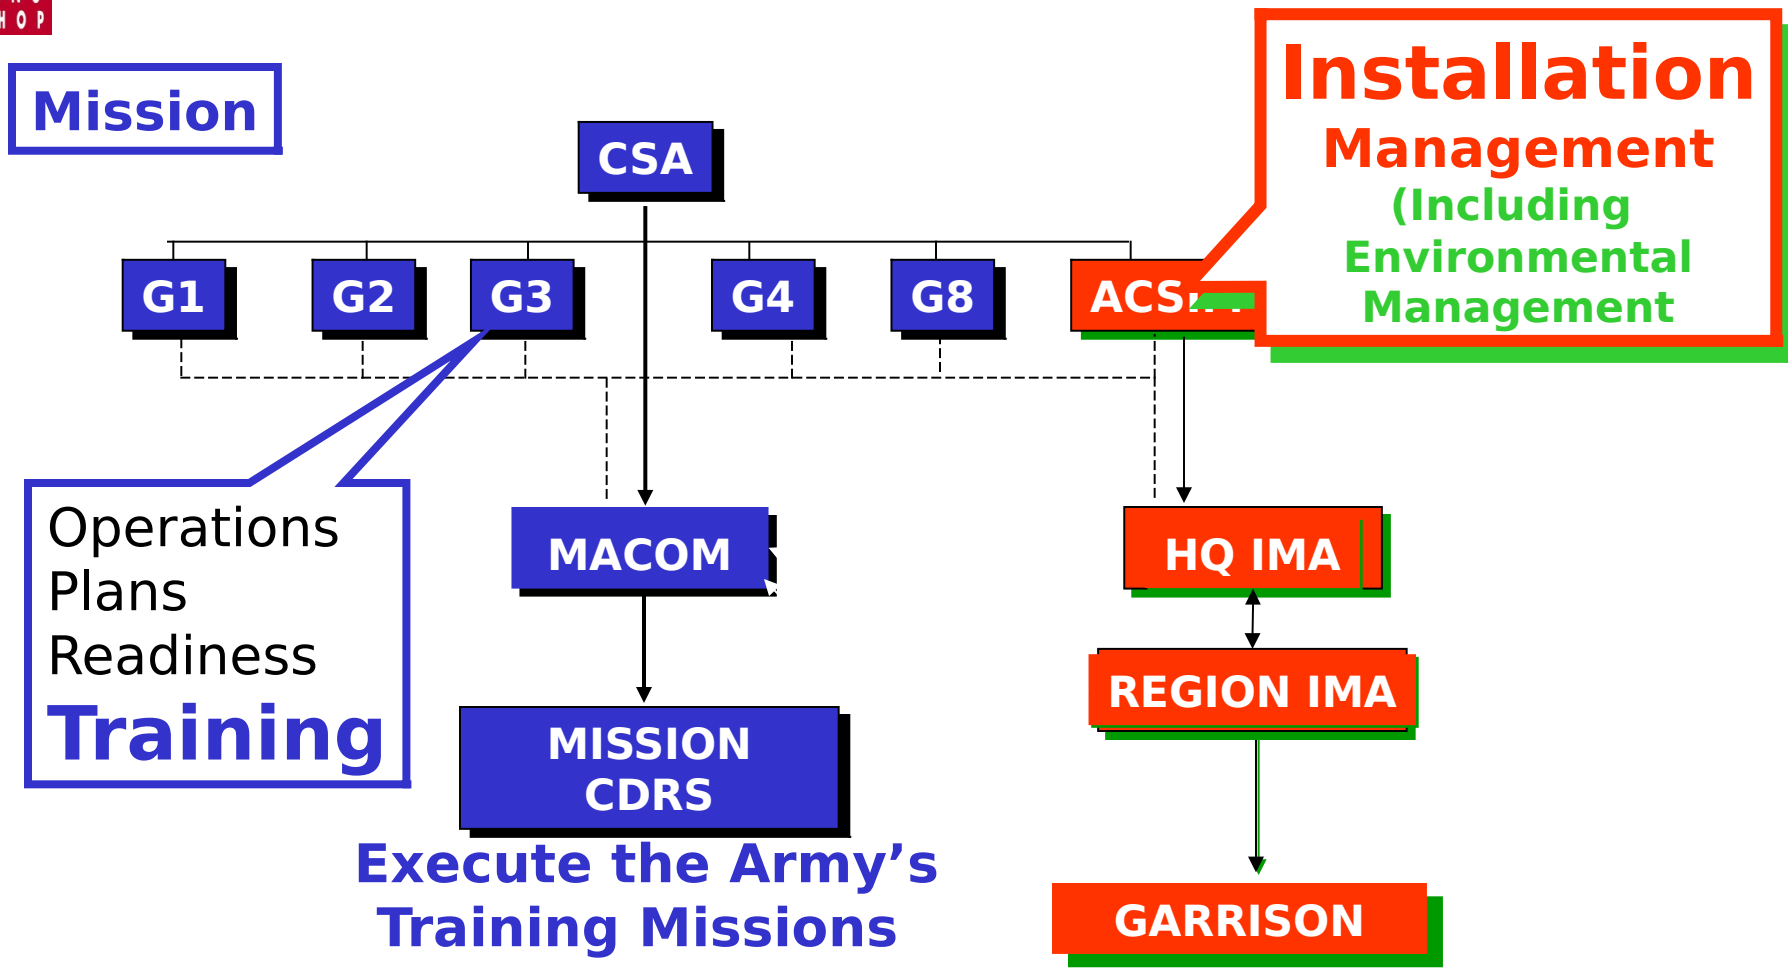
What are “RANGES” ?



What are “RANGES” ?

Training

- **Part of the Army’s TRAINING DOCTRINE:**

- ***Home Station/Deployed Units***
- ***Institutional - Schools***
- ***Leader Development***

X

- ***Individual (Soldiers)***
- ***Collective (Units)***

TRAINING SUPPORT

RANGES

A Typical Army "Range" Complex

Training

Small Arms Ranges

Crew-served Weapons Ranges

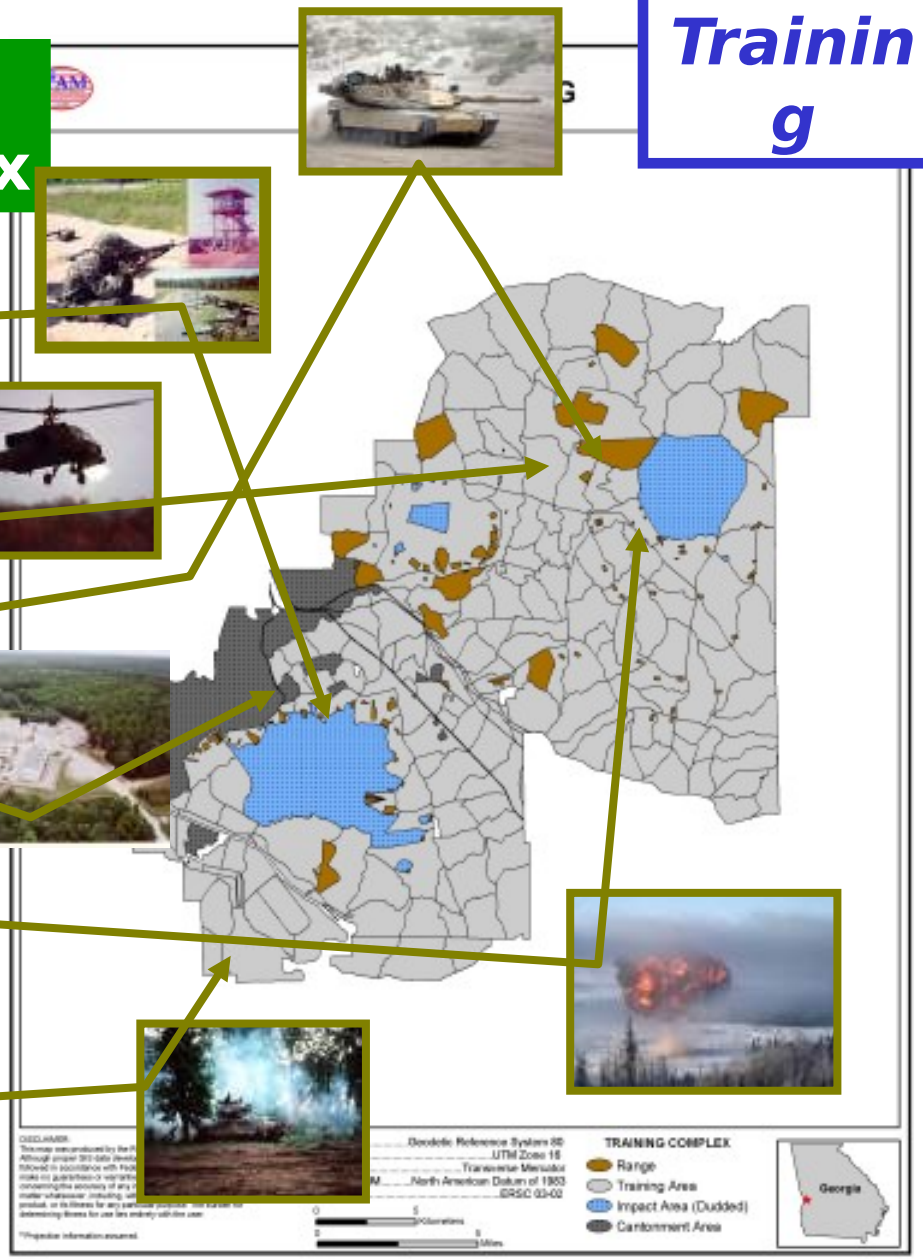
Multi-purpose Ranges

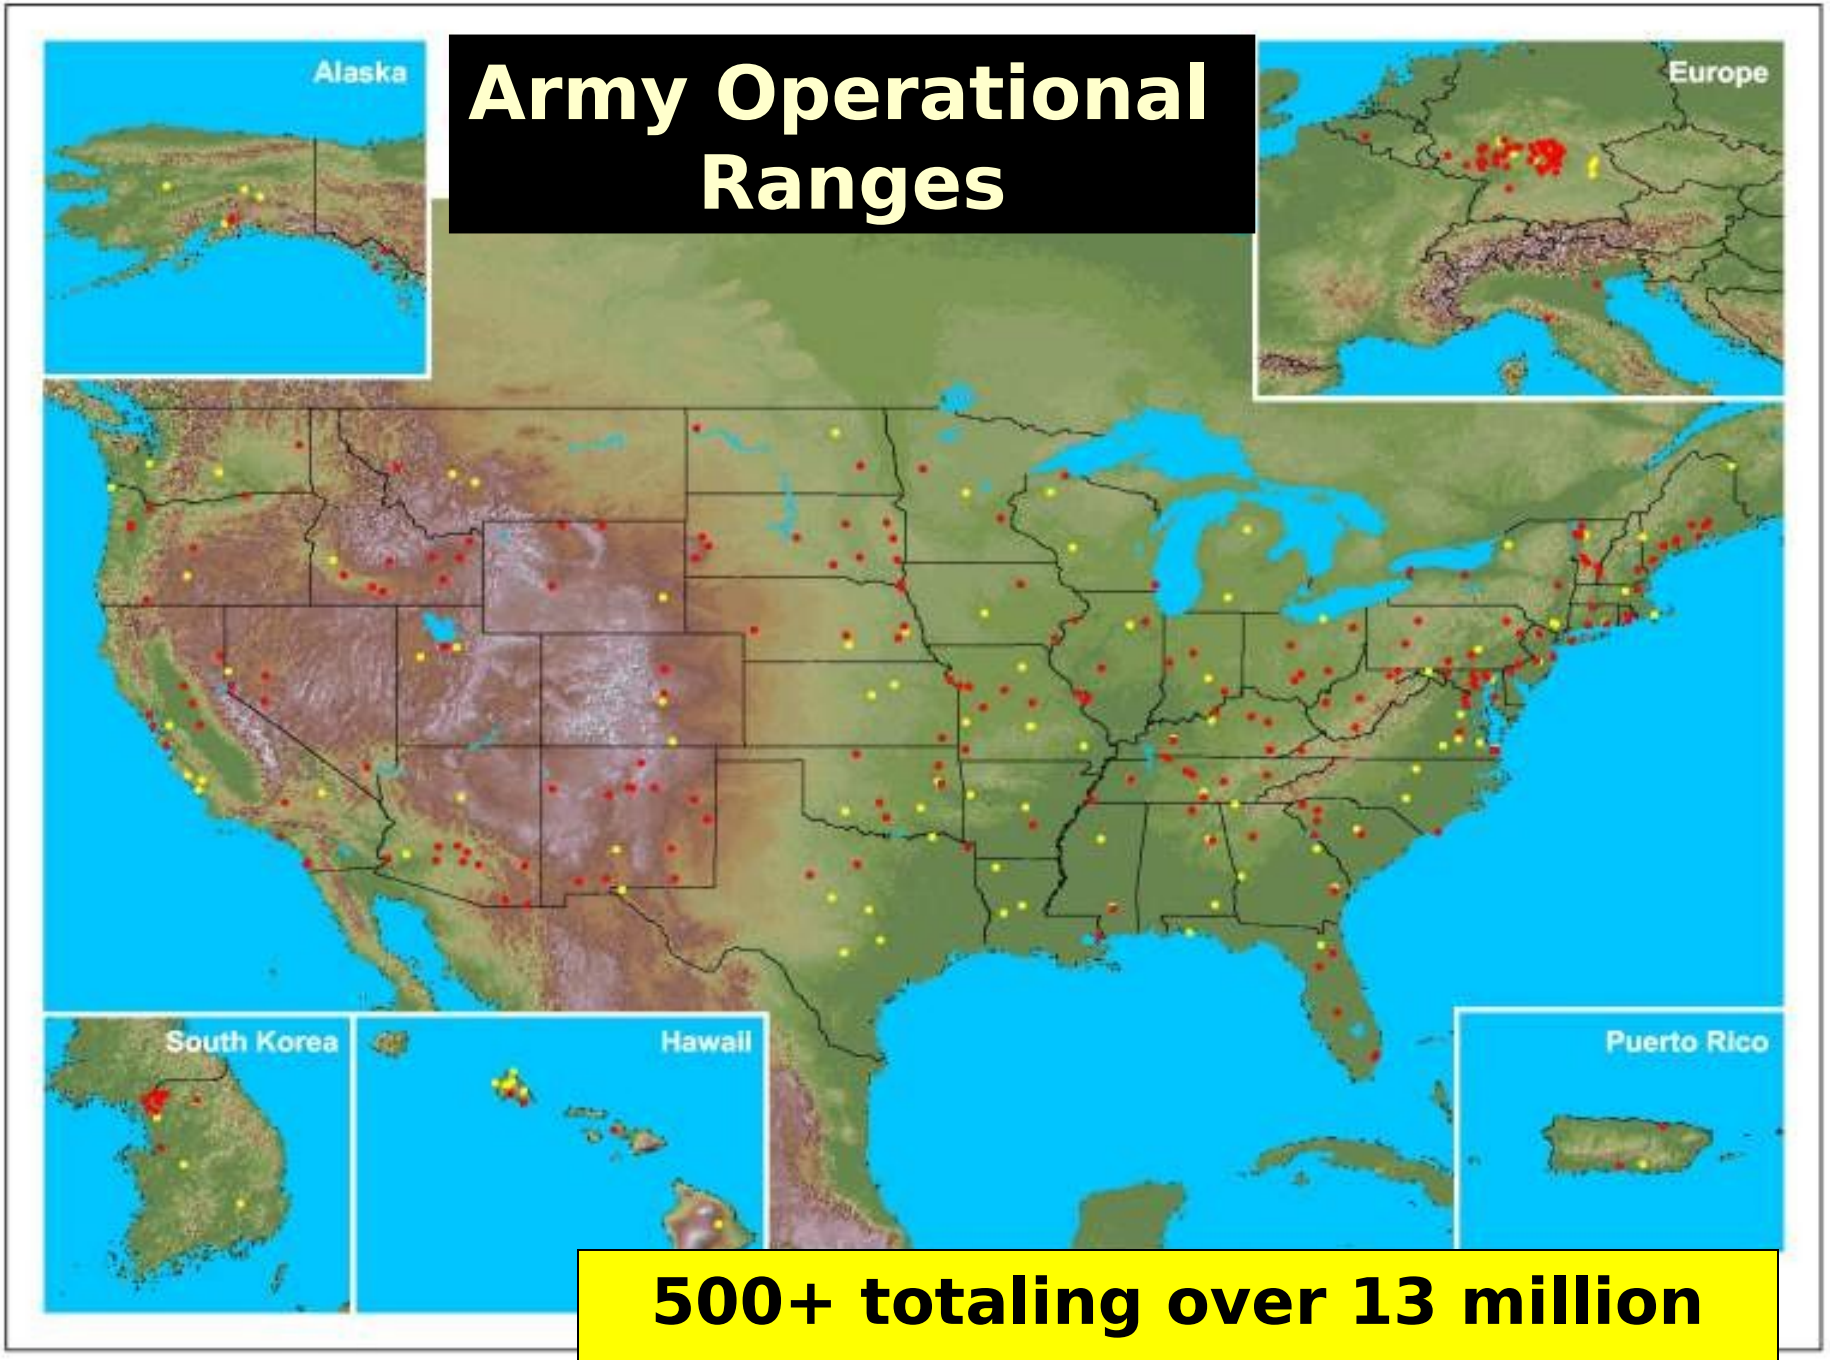
Special Purpose Range

Impact Areas

- **Dudded**
- **Non-Dudded**

Training Areas



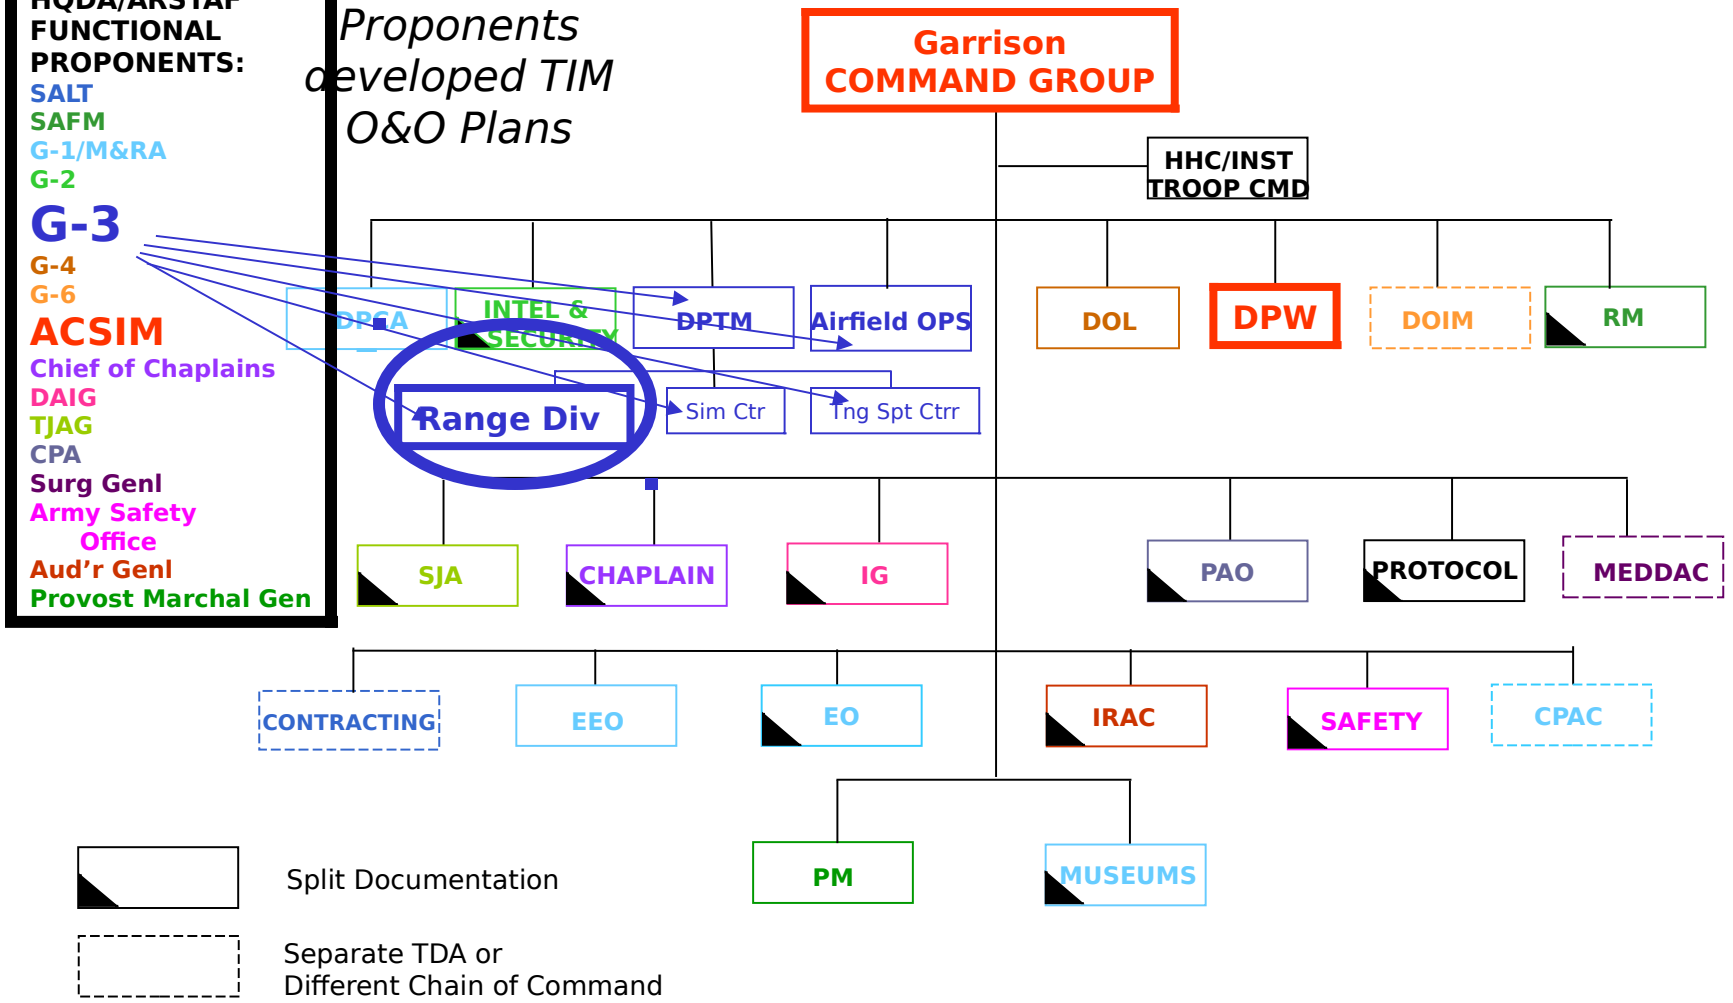


Army Operational Ranges
Alaska
Europe
South Korea
Hawaii
Puerto Rico
500+ totaling over 13 million acres

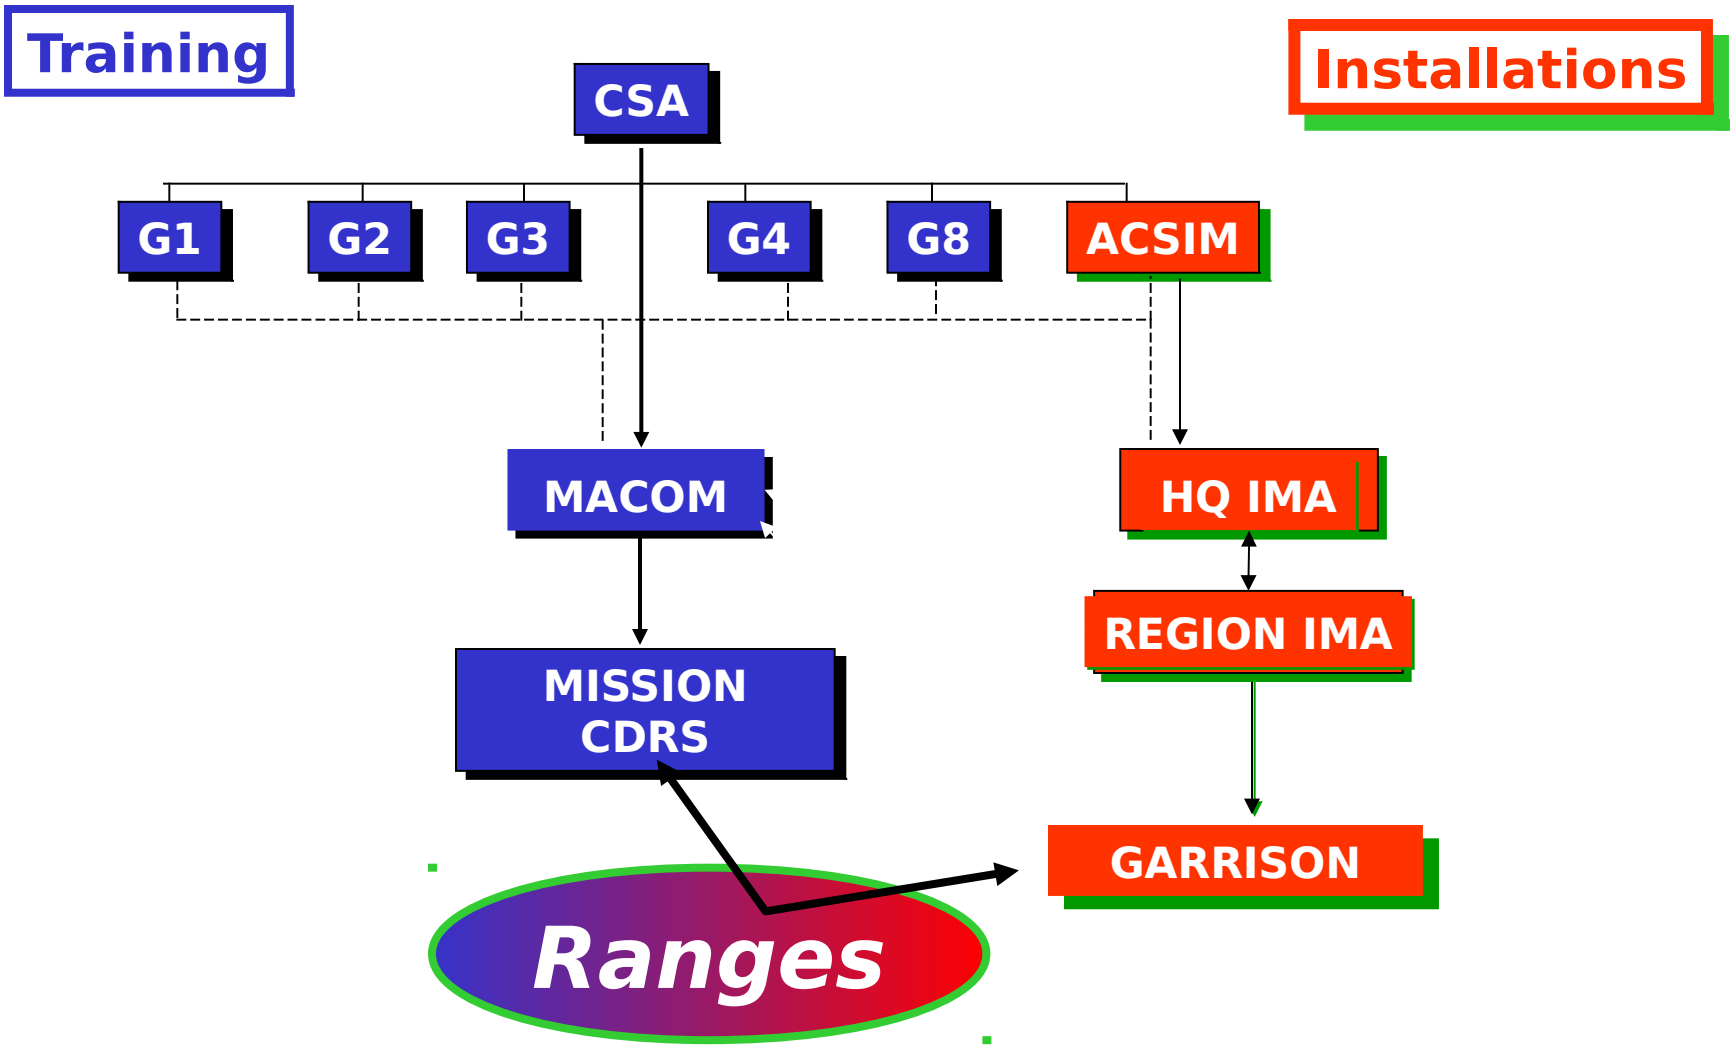
Garrison Organization
&
HQDA Functional Proponents

HQDA/ARSTAF FUNCTIONAL PROPONENTS:
- SALT
- SAFM
- G-1/M&RA
- G-2
- **G-3**
- G-4
- G-6
- **ACSIM**
- Chief of Chaplains
- DAIG
- TJAG
- CPA
- Surg Genl
- Army Safety Office
- Aud'r Genl
- Provost Marchal Gen

Proponents developed TIM O&O Plans



What are “RANGES” ?



Army G-3
Core Range Programs

Range Programs Structure

Army G-3 Sustainable Range Program (SRP) "Core" Components

- ***RTLP (MDEP VSCW) (Includes Rge Mod thru FY04)*** — *Range Operations*
- ***RTLP (MDEP VSRM) (Starting FY05)*** — *Range Modernization*; *Land Management*
- ***ITAM (MDEP TATM)*** — *Land Maintenance*

Range Operations

- Range Division DACs in AC & USAR
- Some reimbursable State Employees in ARNG
- Day-to-day range ops
  - *Consumables*
  - *Contracts*
  - *Other misc functions*
- Maintenance of range technology
- NEPA and other planning documents for range mission activities.
- Operational UXO clearance
- Travel & Training of range ops personnel.

Range Operations

- SCHEDULE
- SUPERVISE
- ENSURE SAFETY
- OPERATE
- MANAGE
- “MAINTAIN”
- PLAN TO SUPPORT NEW MISSIONS

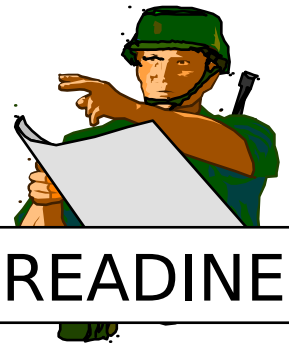
ITAM

Integrated Training Area Management

Not Environmental Management/Compliance. Not in EPR.

STEWARDSHIP

ITAM
"THE BRIDGE"



READINESS

SCIENCE

DOCTRINE

SCIENTIFIC REQUIREMENTS FOR "ECOSYSTEM" MANAGEMENT

TRAINING LAND

TRAINING REQUIREMENTS FOR LAND and RANGES

ITAM transferred from ACSIM to G-3 in FY96.

ITAM

Components

1. LAND CONDITION TREND ANALYSIS (LCTA)
2. TRAINING REQUIREMENT INTEGRATION (TRI)
3. LAND REHAB & MAINTENANCE (LRAM)
4. SUSTAINABLE RANGE AWARENESS (SRA)
5. Geographic Information Systems (GIS)

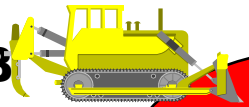
ITAM PROCESS & SCOPE

LAND CONDITION TREND ANALYSIS (LCTA)

- SURVEYING
- MONITORING
- MAPPING (GIS)

LAND REHAB & MAINTENANCE (LRAM)

- MANEUVER DAMAGE REPAIR
- DAMAGE PREVENTION
- RECONFIGURING TRAINING AREAS



CONTINUOUS CYCLE

TRAINING REQUIREMENTS INTEGRATION (TRI)

- ASSESSING (ATTACC)
- SCHEDULING
- SITING

SUSTAINABLE RANGE AWARENESS (SRA)

- INFORMING USERS
- REDUCING IMPACTS

Range Modernization

Transforming Army Ranges

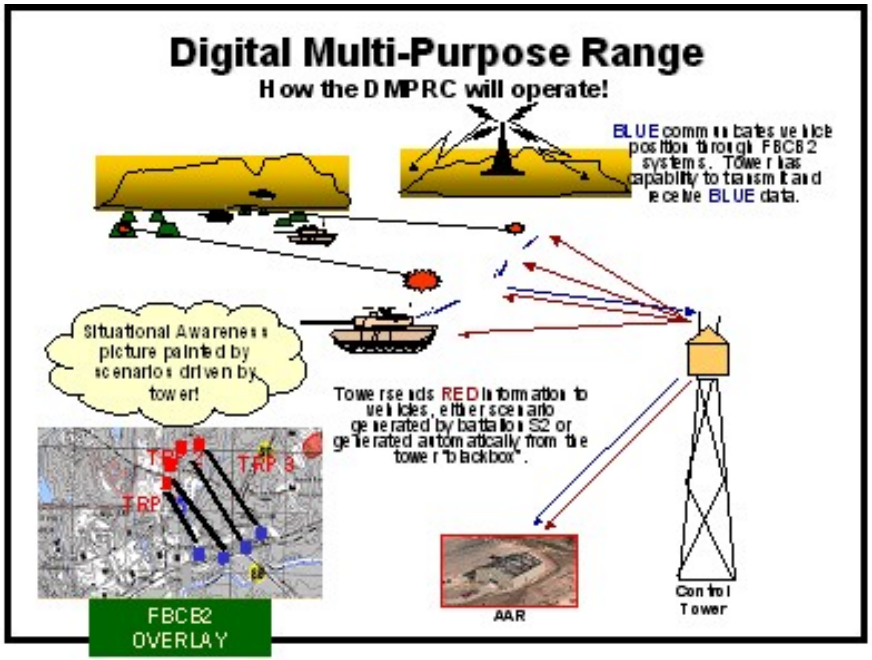
Current Force

Future Force

Computer Supported

- Fixed Facility
- Target Arrays
- Scoring System
- No Embedded TADSS

Instrumented



Digital Multi-Purpose Range
How the DMPRC will operate!
BLUE communicates vehicle position through FBCB2 systems. Tower has capability to transmit and receive BLUE data.
Situational Awareness picture painted by scenarios driven by tower!
Tower sends RED information to vehicles, either scenario generated by battalion S2 or generated automatically from the tower "blackbox".
TRP
TRP 8
TRP
FBCB2 OVERLAY
AAR
Control Tower

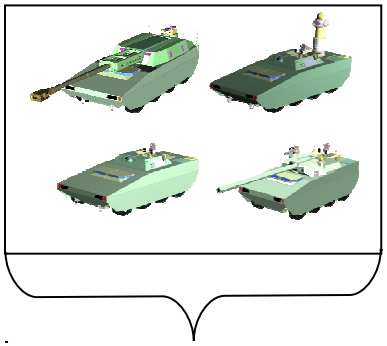
- Links to FBCB2
- Links to Virtual & Constructive

Seemless

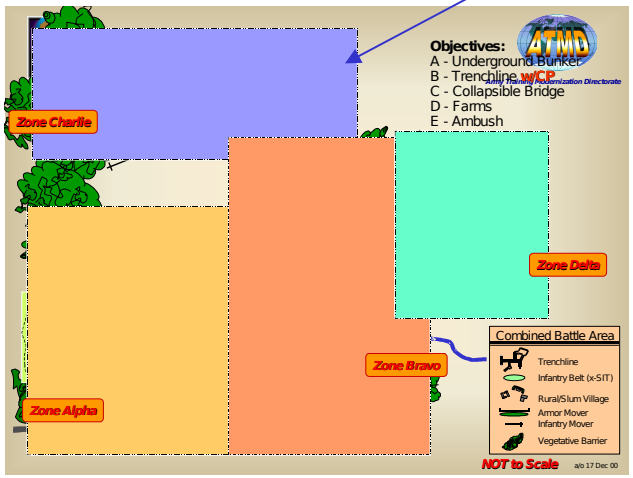


"FCS" Range

- Semi-Fixed Facility
- Instrumented + IS maneuver area
- Links to Embedded TADSS
- Deployable

Range Modernization Priorities

- **G-3 Priority #1: Stryker Brigade Combat Team (SBCT) Ranges**
  - **SBCT 1& 2 = Lewis/Yakima**
  - **SBCT 3 = Alaska**
  - **SBCT 4 = Polk**
  - **SBCT 5 = Hawaii**
  - **SBCT 6 = PA ARNG (FIG, Pickett, AP Hill)**
  - **SBCT = USAREUR**



ALLOWANCE:

25mm Zero Range
Modified Record Fire Range
Combat Pistol Qualification Range
Multipurpose MG Transition Range
Grenade Launcher Range
Sniper Field Fire Range
MK-19 Range
Hand Grenade Qualification Range
Anti-Armor Tracking Range
Mortar – Firing Points, Ops & Impact Area
Stationary Gunnery Range
Digital Multipurpose Training Range

Battle Area Course

CAMTF MOUT Suite:
- Combined Arms Collective Training Facility
- Urban Assault Course
- Shoot House
- Breach Facility

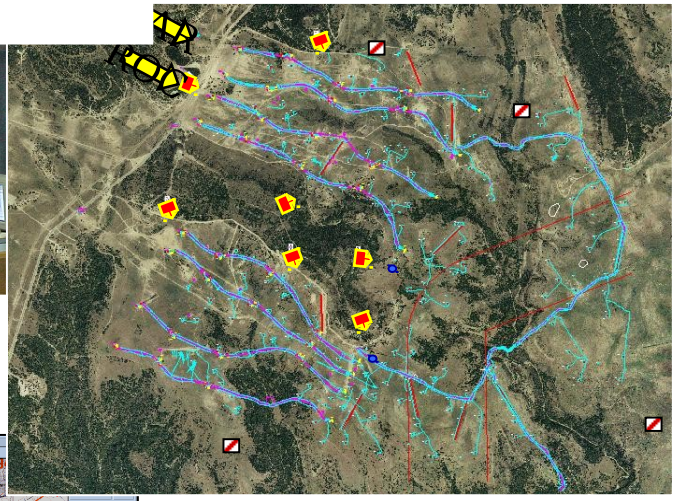
Local Training Areas

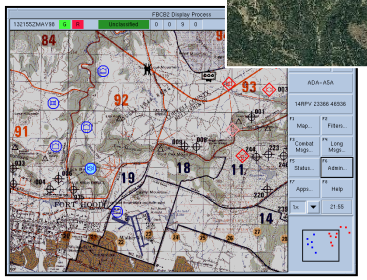
Each Commander determined requirements based on METL and local conditions.

Range Modernization Priorities

- G-3 Priority #2:

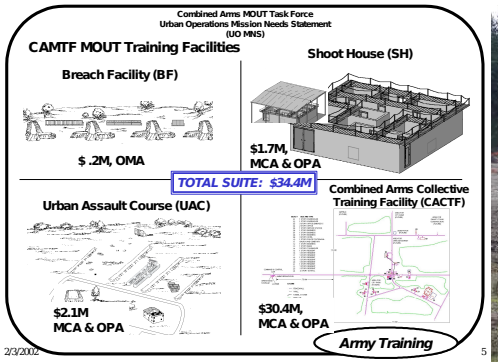
Instrumented (Digital) Ranges for Legacy BCTs

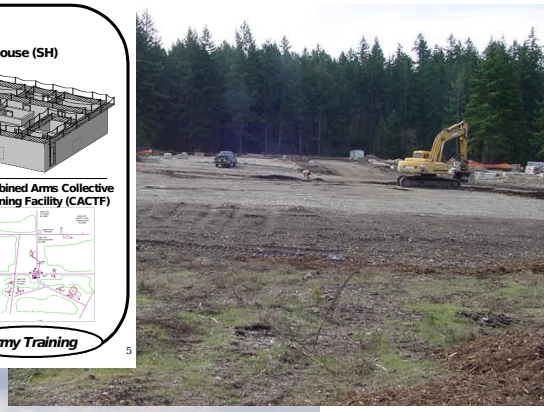


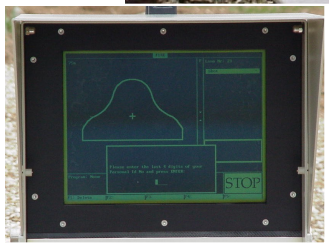


Range Modernization Priorities

- G-3 Priority #3: Other Home Station Ranges to include “CAMTF” MOUT IAW MACOM Priorities







Range Modernization Planning Process

Range Modernization Process
What ?

- *Improve the integrated planning and execution process that supports Range Modernization.*

- *Ensure Range Modernization supports the Future Army.*

Range Modernization Process
Why ?

Hood DMPRC:

- $30M, MCA + $25M, OPA, project
- Came to a stop in Spring 03
- UXO, Range Design & Functionality Issues

Hood DMPRC Status:

- HQDA seeking additional $10M MCA from Congress
- $2.5M, OMA, spent for UXO clearance
- Additional $1-1.5M for OPA due to delays
- **Project completion 18 months late – Jul 05 vs Jan 04 – affects Reset & readiness of 4ID**

Hood DMPRC Lessons Learned:

- Better integrated installation level planning.
- An integrated Installation Range Complex Master Plan.
- Projects brought forward from that plan as installation RDP input
- QA/QC through a Planning Charrette process - HQDA AMRP Technical Team.

Range Modernization Process

1 Doctrinal Requirements Analysis

Army Sustainable Range Program

Sustainability

Sustain:

- *to give support to (readiness ?)*

Army Sustainable Range Program

- *of, relating to, or being a method of harvesting or using a resource so that the resource is not permanently damaged.*

GEN Pete Schoomaker

35th Chief of Staff of the Army
1 August 2003

"Sustained engagement of our Army will be the norm, not the exception."

Challenge: Three Range Management Perspectives

Ranges as a part of Training Doctrine

Ranges as the

Ranges as Facilities

Army Sustainable Range Program (SRP)

GOAL: ***Maximize the capability, availability, and accessibility of ranges and training land by minimizing restrictions brought about by external factors.***

Army SRP

Three Tenets:

- Information Excellence – best data on ran
- Integrated Management – multi-discipline
- Outreach - Why we train.

- **Ranges as Training Enablers.**
- **Ranges as Facilities Infrastructu**
- **Ranges as the Environment.**

- **Impacts:** What are the impacts ?
- **Practices:** What modifications to management procedures support the mission while minimizing adverse environmental impact ?

Operational* & *Environmental

Other SRP Initiatives

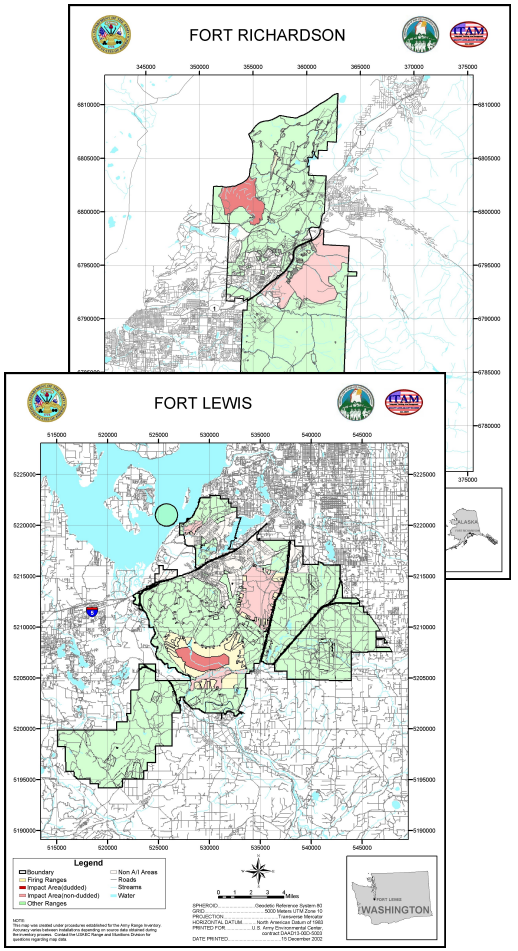
RFMSS

RFMSS: Range Facility Manageme

- Computer-based Range Scheduling Operations, and Information Management System.
- Displays Facility Types, Capabilities, and Constraints.
- Incrementally increasing use of spatial data and displays
- RFMSS 2002
  - Centrally Funded by HQDA
  - Replace All HW – Standardize all SW
  - Upgrade SW in 5 Increments
  - Provide Support & Training

Active / Inactive Range Inventory

(With OACSIM)



Army Range Inventory : JUL 2000 – DEC 2002

479 installations/sites inventoried

- 10,520 Ranges now included in the Army inventory
- 50 States, along with Korea, Germany, Puerto Rico, Italy, Belgium, and American Samoa
- Over 15 million acres of training land documented
- 235 new sites identified for the Army

Army-Wide Standard Range Data

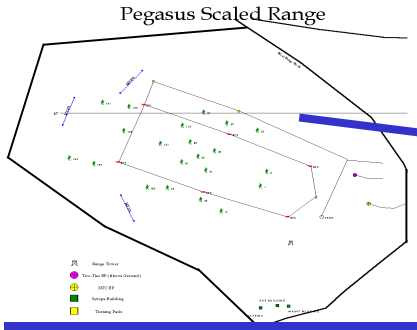
- Tables/Range Maps
- GIS Data
- Ancillary Data
- Discrepancy Reports with Real Property Accounting System

Enables Army-Wide Reporting, Maps, and Queries

Army will sustain, maintain, and update A/I Inventory Data

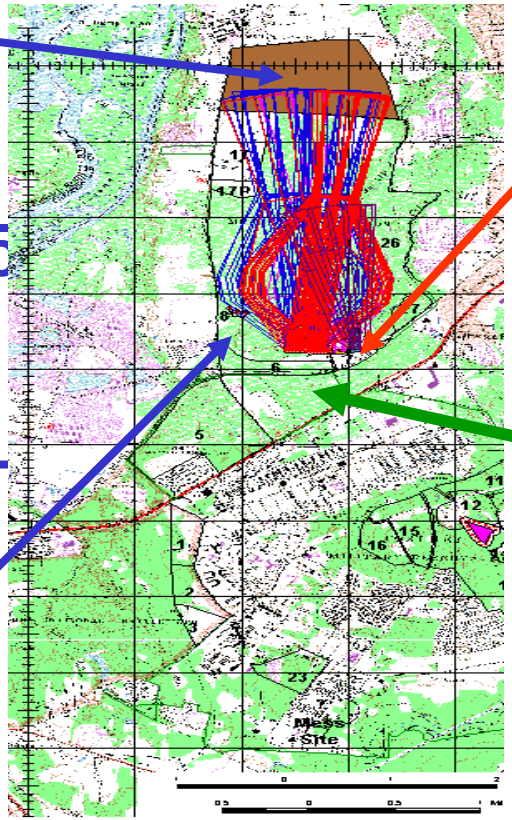
“Enterprise” GIS for Ranges

INFORMATION EXCELLENCE by maintaining accurate range data to protect readiness and answer basic questions on how we manage.



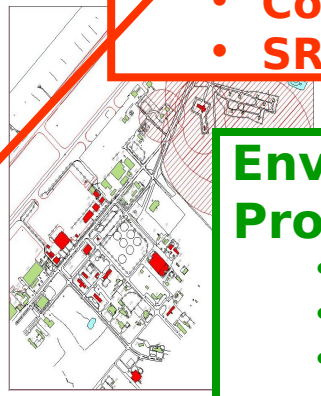
RANGE OPS & MC

- Safety
- Planning
- Use
- Construction



Facilities Managemen

- Accountability
- Condition – ISR
- SRM – Maintenance



Environmental Program

ess than two years 3					
wo - four years 2					
ive to nine years 1					
o sensitivity 0					
Level of Regulatory Support H=3, M=2, L=1, N=0					
High: Agencies actively encouraging or desire to partner with installation. 3 points					
Medium: Agencies acknowledge that a PLI might help an encroachment problem. 2 points					
Low: Installation has not pursued PLI discussions wit regulatory agencies. 1 point					
None: Regulators do not support PLI or are unwilling t grant relief. 0 points					
Level of Private Support H=3, M=2, L=1, N=0					
High: Offpost officials/landowners are actively encouraging PLI effort. 3 point					

1~n ACUBs

Candidates for Buffers

Army Range & Training Land Strategy

Mission Factors Matrix Analysis Structure

CATEGORY 1: Installations that have an Army-wide strategic and enduring training mission capability

- Tier 1- Major Training installations with strategic training value to the Army

- Tier 2- Installations with significant training value to MACOMs and having high range and land capability.

- Tier 3- Installations with range and land capability, and training value to MACOMs.

CATEGORY 2: Installations with limited mission capabilities that provide training opportunities to local commanders.

- Tier 4 – Training Areas with value to local commanders and have a limited collective range and training land capability.

- Tier 5 - Local Training Areas with time-distance value that supports small unit training.

Army Range & Training Land Strategy

Land Acquisition Matrix Structure

Strategic Training Land Priorities: tiers off the results of the Mission Factors Matrix to provide a HQDA a priorities to protect live training capabilities into the future

Near-Term Acquisition Priorities (CF/SBCT)

- Critical training land shortfalls
- Some land available for acquisition
- Time sensitivity (5-10 year window)

Mid-Term Acquisition Priorities (FF)

- Large areas of available land
- Little or no time-sensitivity (10-25 years)

Strategic Land Reserves : Any installation exceeding 750,000 acres

OSD Perspective on SRP

- **DoD Directive 3200.15:**
  Sustaining Ranges and Operating Areas (OPAREAS

Army SRP Outreach Program Objectives:

- Market Analysis
- SRP Messages & Consistency
- Outreach Training Support Packages
- Program Integration
- Implementation Strategy

Installation Focus

Did you know…?

One of the basic precepts of every successful Army in history is…

“We must train as we fight.”

Makes training an Army priority.

Did you know…

Live training

is soldiers practicing the things they will do individually or as part of a team the same way they will do them during combat.

Makes ranges and training land so important.

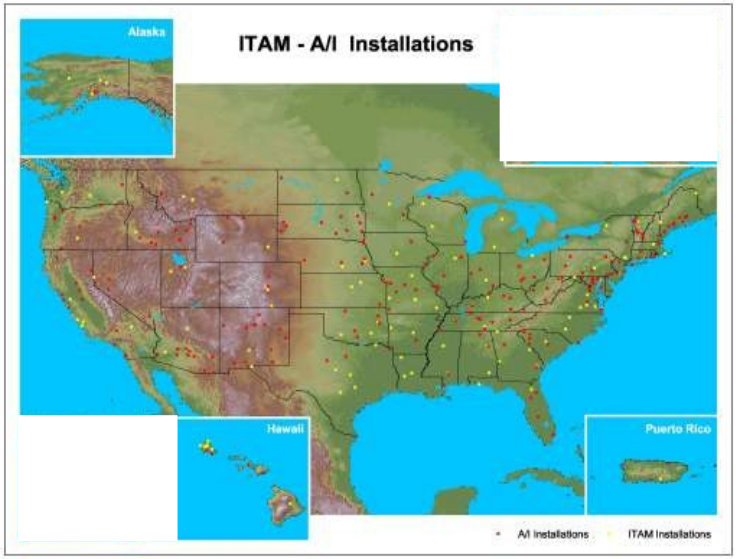
Did you know…?

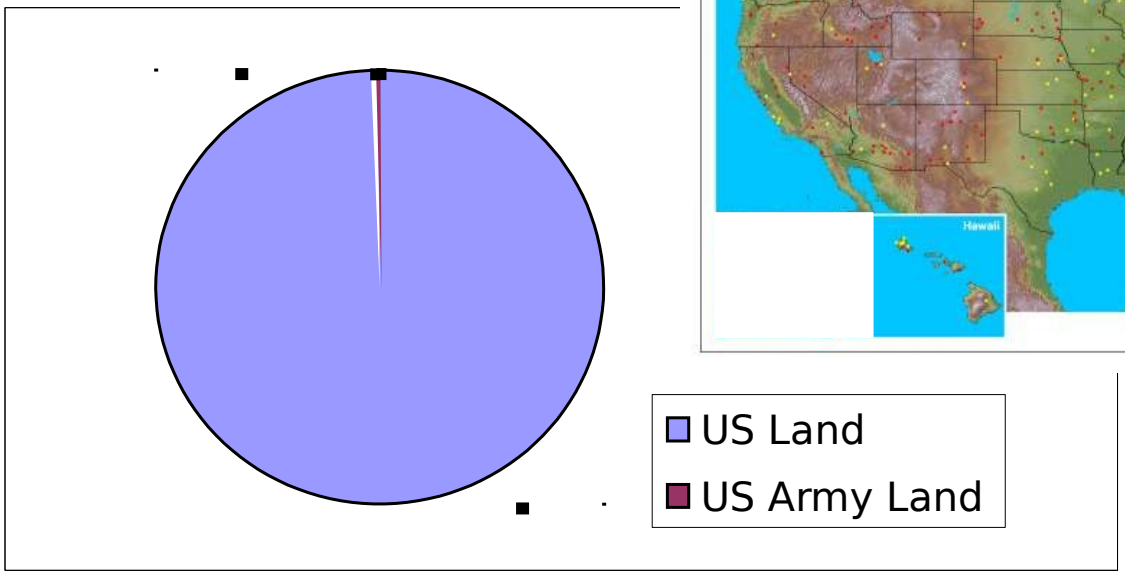
About 1 million ARMY soldiers…

Active Army, Army Reserve & Army National Gua

…must carry out sustained engagement on behalf of 285 million Americans.

Did you know…?





The Army manages approximately 15 million total acres.

Upon which our Active, Reserve & National Guard
Soldiers train for sustained engagement

The object of all of this…

Continued dedication to the Training and Readiness of Soldiers !
